

OUR EARLY FOUNDATIONS CURRICULUM

Created by our expert Education team and validated by industry leaders, our proprietary Early Foundations® curriculum defines the experiences necessary to support a young child's developing mind. It's designed to be flexible to your little learner's budding interests, and to meet each and every child exactly where they are emotionally, physically, and of course, academically.

Our Whole Child Approach

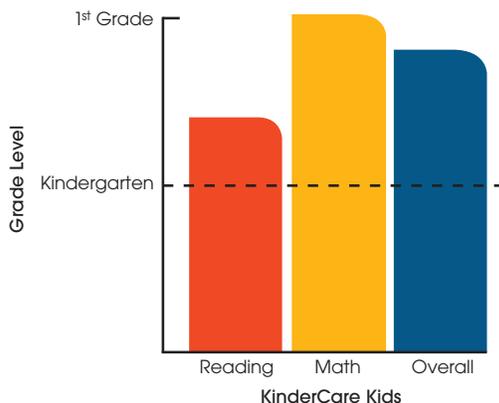

Early Foundations develops the whole child and focuses on the six areas critical for balanced growth and learning:

And We Know Our Curriculum Works!*

OUR KINDERGARTENERS TEST AT FIRST-GRADE LEVELS

THE LONGER THEY'RE WITH US, THE BETTER THEY DO!

TESTED
17%
HIGHER

By the 7th month of kindergarten, KinderCare children test at first-grade levels in both math and reading.

Children who have been with us for more than a year tested 17% higher overall than those who have been with KinderCare for less time.

FLIP TO LEARN MORE ABOUT OUR PROGRAMS FOR EVERY AGE!

*Results based on the TerraNova® Third Edition assessment of over 1,600 children in March 2016.

OUR PROGRAMS

Our programs deliver just the right mix of fun and learning to satisfy curious children's interests. With over 40 years of expertise, we're here to support you, whether your child has first steps, first words, or first grade on the horizon.

Talk with your Center Director to find the program for you!

Infant (0 - 12 months)

Even before first words or first steps, so much happens in your baby's first year. The words spoken or read to them, and the songs we sing to them are all the building blocks of your baby's brain development.

Toddler (12 - 24 months)

Toddlers are all about moving and exploring! We love their energy and activity, helping their vocabularies grow, seeing all that can be expressed through scribbles, and watching sweet friendships develop.

Discovery Preschool (2 - 3 years old)

Why? Why, why, why? We're here to guide sprouting conversations and answer your two-year-old's curious (and endless) questions on their quest for answers.

Preschool (3 - 4 years old)

From pointing out the "S" in a stop sign or the number "3" on the bus, we love sparking these discoveries and seeing them happen in the most unexpected places and ways.

Prekindergarten (4 - 5 years old)

From doodles to recognizable letters, we love seeing your budding novelist begin their journaling adventure. Your prekindergartener will begin recording thoughts, ideas, and experiences through pictures and writing.

Kindergarten* (5 - 6 years old)

This class is full of little scientists who describe, collect, organize, and make sense of the world around them. Listen as they hypothesize about people, places, things, and even brainstorm as a group.

* IF YOUR LITTLE ONE ISN'T QUITE READY FOR KINDERGARTEN, ASK ABOUT OUR TRANSITIONAL KINDERGARTEN PROGRAM.
